Title: Final business in my company

He made an excellent speech on his career development process, changing his job from the current company to a new challenging company and new work. He explained how he cooperated with the training of young recruits of the company, requested by the top

management. The good part of the story was that the CEO has seen his performance of training and tried to retain him by offering the manager's position. But he declined because his determination was tight and firm for future development.

Time: 5-7 minute

PS2 ----- TM Takimoto

Project: Presentation Masterly 1-3 Researching and Presenting

The purpose of this project is to learn or review basic research method and present a well-organized, well-researched speech on any topic.

Title: Talking plants

Presented a romantic and fantasy- world speech on communicating plants. It was very interesting phenomena to be able to observe and prove the experiment of plant communications. But she managed to tell us the story in a manner as if it were true and proved by the plant scientists. We all enjoyed her dreamy and fancy story with her serious manner and gestures and vocal varieties used. I remembered she liked story of ghosts, spiritual world life, fairly tale type speech, exotic and unbelievable stories, which attracted audience attention and gave excitements and fun feelings. She is a real and great story teller!
